

SUPERIOR AUDIO FOR EVERY WEB MEETING

Great audio quality is an essential component of every web meeting. GlobalMeet Audio can be seamlessly integrated with many popular web conferencing products, delivering superior voice quality for every web meeting.

GLOBALMEET AUDIO PLUG-IN FEATURES:

- + **Join the Call** – have the web conference call you for your audio connection
- + **Dial-Out** – dial out or invite via email to add participants during the meeting
- + **Mute All** – silences all participants with a single click
- + **Lock the Call** – control participation on your call
- + **Mute User** – mute individual lines to eliminate distracting background noise
- + **Change Volume** – adjust the volume on your conference call
- + **Merge Users** – merge selected web users with their audio line
- + **Hang Up User** – disconnect a participant

**Some features may vary by product and version.*

GlobalMeet Audio seamlessly integrates with:

PARTICIPANTS INSIDE AND OUTSIDE
OF YOUR COMPANY

COMMITTED TO MAKING EVERY WEB MEETING BETTER.

Crystal-clear audio quality

Get a better meeting experience with reliable, high-quality audio that makes meetings more productive and efficient.

Global coverage

Connect participants from across the globe with more than 160 local access points.

Large meeting capacity

Deliver flawless, reliable audio quality on calls with up to 300 participants with no degradation due to increased meeting capacity.

Proven enterprise-grade audio network

GlobalMeet Audio is a hybrid IP audio network that hosts more than 60 million audio meetings each year.

Host controls for better meeting management

Conference hosts are equipped with a range of audio controls to make meetings more productive.

Seamlessly integrated

Meetings continue to be managed through your existing web conferencing interface, requiring no additional end user training.

GlobalMeet Audio is brought to you by PGI, a leading global provider of collaboration software and services.
